Qian Liu(刘乾)

liuqian@sea.com · https://siviltaram.github.io · SivilTaram

Experience

Sea AI Lab, Singapore 2022.7 – Present

Research Scientist & Team Lead, *Natural Language Processing* Group

Microsoft Research Asia, China 2018.2 – 2022.6

Research Intern, *Data, Knowledge and Intelligence* Group ♢ Leader: Jian-Guang Lou & Bei Chen

Microsoft Research Asia, China 2016.7 – 2017.8

Research Intern, *Big Data Mining* Group ♢ Leader: Zaiqing Nie & Yohn Cao

Education

Beihang University 2017.9 – 2022.6

Ph.D. in Computer Science and Engineering ♣ Joint Program with Microsoft Research Asia

Beihang University 2013.9 – 2017.6

B.S. in Computer Science and Technology, Ranking 7 / 233

Research Interests

- **Code Generation**: *Building responsible, reliable and interpretable code generation models.*
- **Language Reasoning**: *Improving fundamental reasoning capabilities of language models.*

Selected Projects

Sailor: Open Language Models for South-East Asia 2023.4 – Present

We present Sailor, a family of open language models ranging from 0.5B to 7B parameters, tailored for South-East Asian (SEA) languages. These models are continually pre-trained from Qwen1.5, a great language model for multilingual use cases. From Qwen1.5, Sailor models accept 200B to 400B tokens, primarily covering the languages of English, Chinese, Vietnamese, Thai, Indonesian, Malay, and Lao. The training leverages several techniques, including BPE dropout for improving the model robustness, aggressive data cleaning and deduplication, and small proxy models to optimize data mixture. As the project leader, I made comprehensive plans, implemented effective team collaboration models, identified critical paths, and explored a variety of innovative technologies to drive the project forward.
